

WE'RE HIRING!

# Senior Water Engineer

At WSC, we are leaders, influencers and innovators. We are passionate about **Creating a Better Water Future<sup>®</sup>** integrating engineering, technology and communications to deliver extraordinary value for the communities we serve.

As a Senior Water Engineer, you'll lead teams in planning, designing, and managing medium- to large-scale water infrastructure projects. Responsibilities include client service management, fostering new relationships, and identifying business opportunities. You'll lead project pursuits, facilitate workshops, and mentor junior staff. Additionally, you'll oversee project scopes, budgets, schedules, and prepare various written documents.

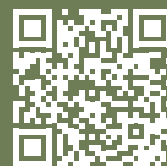

## WHAT YOU BRING

- Bachelor's in Civil/ Environmental Engineering or related; Master's preferred.
- P.E. registration in California or ability to obtain within 6 months.
- 7+ years' experience in water infrastructure planning, design, and/or construction.
- Proven track record achieving client goals with cost-effective, sustainable outcomes.
- Strong communication skills; adept at writing proposals and technical documents.
- Team-oriented mindset; active in professional associations.
- Desire for autonomy, risk-taking, and accountability.
- Leadership in project workshops and alternative analysis.
- Passion for mentoring and advocacy within the team.

Hiring in all locations with hybrid remote flexibility.

WE'RE HIRING!

# Staff Water Engineer

At WSC, we are leaders, influencers and innovators. We are passionate about **Creating a Better Water Future**® integrating engineering, technology and communications to deliver extraordinary value for the communities we serve.

As a Staff Water Engineer, you'll take the lead and collaborate within multi-disciplinary teams dedicated to planning, designing, and managing water infrastructure. Your responsibilities will encompass serving as a project engineer, supervising the design of water, wastewater, and/or recycled water infrastructure projects, while progressing towards assuming project manager duties for a diverse range of infrastructure design and planning projects.

## WHAT YOU BRING

- Bachelor's in Civil/Environmental Engineering or related; Master's preferred.
- Minimum 2 years' experience, ideally in water infrastructure design.
- P.E. registration in California or ability to obtain within one year.
- Strong communication skills, both verbal and written.
- Track record of achieving client goals with innovative outcomes.
- Team player mentality; eager to learn and teach.
- Passion for self-improvement and skill development.
- Willingness to take risks and be accountable.
- Effective client service skills; active in professional associations.
- Proficiency in AutoDesk Civil 3D or BIM/Revit 3D design a plus.

Hiring in San Luis Obispo, CA  
with hybrid remote flexibility.
