SURVEYORS

Our Firm:

Since 1953, MacKay & Soms has been helping home builders, developers and public agencies meet their project objectives and get their projects built. From offices in Pleasanton and Roseville, Mackay & Soms serves public and private clients throughout Northern and Central California. Our multi-disciplinary teams provide a full array of development and public works consulting services including planning, engineering, surveying, and sustainable design.

The Work:

Our civil engineering professionals solve complex civil engineering problems; perform challenging earthwork, drainage, water quality, potable water, and sewer designs; utilize the latest computer technology and AutoCAD/Civil 3D software; and prepare high-quality calculations, plans and specifications for each of our projects.

Your Career:

As a full-service consultant, MacKay & Soms provides the perfect environment to pursue a wide range of professional interests and apply your complete set of technical skills. We encourage professional registration and have helped many of our employees achieve this goal – in fact, over one-half of our employees are either licensed engineers, surveyors, or both.

Benefits:

Ask a MacKay & Soms employee about company benefits and you'll hear about more than health insurance and vacation days; you'll hear about a long tradition of value and respect for every member of the team, a company culture that encourages collaboration and mentorship, and a work environment that feels more like a family than an office.
