

SCE Officer Interviews

Paige Hermanson
Executive Vice President

Year
Fourth

Concentration
Water

What is something you like but you are terrible at?

Singing

Which Disney character do you think would be the best president?

Mulan

What is your favorite study spot?

TESPA

Anna Johnson
Treasurer

Year
Fourth

Concentration
Structural

What is your favorite hobby?

Ballet (will give lessons)

What celebrity/fictional character has the same personality as you?

Leslie Knope

Advice for SCE members?

Go to all different kinds of events, general meetings, career fair, community service, and PSWC!

Meet your Newspaper Editor:

Davis Ross

I am a third Civil Engineering Major with a Minor in Music. I enjoy hiking, rock climbing, playing piano, and being in the outdoors!

October 2, 2019

Welcome to SCE!

UPCOMING EVENTS

First SCE General Meeting
Wednesday (10/2) 7:00-8:00PM
Building 192-106

SCE Bonfire
Saturday (10/5) 7:00-9:00PM
Grover Beach

SCE Study Hours
Wednesday (10/9) 7:00-10:00PM
Fishbowl Q in Kennedy Library

Welcome new and previous SCE members! We are super excited to have you all back and kick off the upcoming school year! SCE stands for the Society of Civil Engineers, and we are a general Civil Engineering Club here on campus. We host a variety of events, some of these including our bi-weekly general meetings, bonfires, barbeques, Winter Leadership Retreat, and many more! So, if you want to get involved in the club and meet your fellow Civil Engineers, come on out to our events! Down below we have some photos from previous events:

Fun fact:
Drinking too much water can kill you!

Intramural Sports

Come out and play IM sports with your friends and SCE. In order to play please create an IM Leagues account and request to be on the appropriate team. This quarter we have Flag Football and Ultimate Frisbee Teams! If you are interested or have any questions, contact Jacob Hamada at sports.cpsce@gmail.com!

Quote of the Bi-week

"I'mma do the things that I wanna do, I aint got a thing to prove to you, I'll eat my candy with the pork and beans, Excuse my manners if I make a scene"

- Rivers Cuomo, Pork and Beans

HOW DO THEY DO IT?

Newsletter

Believe it or not the newsletter is quite the intensive process. First an idea has to occur then there has to be a planning process which usually involves overthinking things and committing to things that are 100% not necessary and the only reason that they being committed to is that for some reason the need to do something that for some reason will entertain people is a necessity. For example about 3 hours were spent just on the front and back without any content whatsoever and is essentially the same as it was before. Innovation does not come easy. Yet alone without effort. Look at the font opposite of this article. Look at that mess. That is the whole point of it. Who would put the effort into making a personal font that has many variants of the same character. That person would be the newsletter editor of course. As a final idea there is no limit to the amount of ideas that are possible the biggest problem is execution. There are so many things that for one reason or another it falls though another reason to put it off. Once a task is executed then improving on it is so much easier. The SCE Newsletter a biweekly insitution.

Animal Battle Showdown

The Humble Lemming

The BlobFish

CUTENESS

The Humble Lemming wins this one without a doubt the lemming has not been awarded most ugly thing in the world

What can even be said about the blobfish and this category

Appearances in Disney Films

The Humble lemming has appeared in an oscar winning nature documentary. Lets just ignore the forced cliff jumping.

I do not think the blobfish has appeared in a Disney movie. At least it wasn't pushed off a cliff.

Deep Sea Swimming Ability

The Humble lemming if put in the deep sea there might be a small chance of not surviving the trip

This is where the blobfish excels as it has basically evolved to perform this task.

Conclusions

It is really a toss up but I will say that the Humble-Lemming wins. I think it really comes down to just how down to earth the Humble Lemming is

Disclaimer: Of course one could say that my opinion is the most unbiased opinion out there but another might say that my opinion is the most biased one out there so buyer beware.

The Criticism Corner

Cuteness in the 21st Century

Did you know that when people are able to have certain colds people tend to catch? Of course, a catch itself is a disease that is trying to spread to other people, he is self-described "moderate germaphobe" I fear catchy- as every possible mouth disease is near, because of this I have great knowledge of lovely poor catchy in the modern age. Perhaps the worst type of catchy is what I call the medieval catchy because it's just face its exactly how the plague started, I hate it beyond all believable bounds. The nerve of people to not cover their catchy faces absolutely no respect to other people. However, this is really like the 20th century catchy the "Tryp Failure" which is the classic catchy into your hat, everyone does this catchy get it gets on my nose every-time. Lets go down this process of this catchy the catcher catches into their hat, their hat can touch everything that a hat touches (door knobs, other hats, keyboards, etc.) this unexpected receiver of the catchy (the catcher) receives the thousands of germs that the catcher has caught. It is truly a silent killer. Really the only catchy that has been made in the 21st century is the vampire catchy, he you might be able to guess the vampire catchy is my preferred catchy- method. This is when the catcher catches into their elbow and the spread of germs from the get go. No person would normally touch an elbow as its naturally ends the spread of germs. The true way to show respect towards others and catchy in the 21st century is to use the vampire catchy, 24-

Community Person Spotlight

This week's community member spotlight takes a trip down to Orange County as we visit Alon Gary a Third Year Civil Engineering Major. His hopes and dreams are not to be on the SCE Newsletter. When asked about the career fair he claims that he will be attending the career fair this friday. He has a single coffee everyday but he drinks many bottles of water. His favorite baseball team is a High School Baseball team. Can you guess who Alon's favorite professor is? if you guessed Wyatt Hix who teaches CE 259 then you would be correct. However if you didn't guess that you are partially right because technically Wyatt is an instructor as there he lacks a doctorate. It is also important to note that he was standing nearby when he made this comment so there might be so bias there. Some people don't realize that Alon was a POLS major once upon a time. His favorite thing about the College of Liberal Arts is that he realized that he didn't want to be in the CLA. LOOK at this RETRO picture in the QR code.

The More You Know

How to scan a QR Code

1. Take out your phone.
2. If you have an iPhone open the camera app.
3. Point the camera at the QR code
4. Click the pop down link
5. BOOM.
2. Download/Open Google Lens
3. Basically repeat the same process as above

Ever Wonder?

Why do most rocks sink when put into water?

This is such a brilliant question. The answer might surprise you, however the answer might not. The real reason why rocks sink in water is simply because of density. Rocks are denser than water therefore they sink. Now you might point out that some rocks float on water and that is because those rocks are less dense than water.
